

METHODS, SOURCES AND RESOURCES

ISSUES TO CONSIDER

- **Broader issues:**
 - What assumptions do we leave unexamined in our research?
 - How does our own social position affect how we study our topic, and what can we do about it?
 - Can we study music as a fan, and how do we avoid 'getting in the way'?
 - How do we ensure adequate breadth and depth in our research?
 - How do we treat our data sensitively but still critically?

METHODS, SOURCES AND RESOURCES

ISSUES TO CONSIDER

- **Narrower issues:**
 - What makes good academic writing?
 - How do we select appropriate methods and navigate between them?
 - What is a reliable source...
 - ...and how do we deal with reliability online?
