

# MAPS OF RESEARCH

## AN ALTERNATIVE APPROACH

- Spend ten to fifteen minutes drawing a 'map' of your own research ideas.
- This could be a more fully-formed map of your position and previous experiences within your field...
- ...or more of a 'mind-map' of ideas you've developed so far.
- It can be place-focused, or more based on abstract ideas.
- We will then spend a few minutes discussing our ideas with the group.
- Did this help you to consider alternative 'ways into' your research?
